WORK EXPERIENCE

SOFTWARE DEVELOPER AT GOFORE
January 2019 - Now

Working on international projects for clients from different sectors with the aim of help them in their digital transformation.

Migration (AngularJS - Angular) of a measurement equipment manufacturer platform
Finland + Remote work | September 2019 - Now

Working for a leading measurement equipment manufacturer located in Finland that provides a cloud-based measurement data monitoring system, which allows customers to remotely monitor measurement and alarm information on sites. The project has the goal to update the current system technology stack to enable better performance and maintainability. I'm responsible for:
- Analysis, definition and implementation of the strategy to migrate an existing application from AngularJS to Angular 2+
- Update of the existing libraries
- Performance of code reviews for the software quality assurance
- Estimation, implementation and maintenance of new functionalities in the migrated application
- Implementation of unit tests
